- 50% reduction in purchasing process costs

Maximize maintenance effectiveness-Streamline the maintenance process, so you can extend the longevity of your assets and improve productivity.

MRI Software

![MRI software logo]

MRI Software

MRI Software's solutions for retail, MRI's software and services allow you to command and control your property holdings at every level. Smooth automation removes the need for duplicate work, while the configurable software conforms to your organization's roles and processes.

MRI Commercial Management

A central database, which stores all data relating to a real estate portfolio. A fully-functional Accounts Receivable module is built into Commercial Management, to manage all rental, service charges, and associated accounting processes.

General Ledger

Provides complete access and control of all financial information, allowing you to create accurate snapshots of your portfolio's past, present or future financial status.
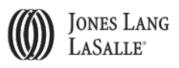

Accounts Payable

Accounts Payable streamlines procedures across your entire property portfolio, minimising manual intervention while improving control of supplier payments.

Advanced Retail Sales

Our specialised retail module allows you track and integrate information about store performance, leases, special events, locations, expenses and taxes or VAT. The system automatically calculates and bills turnover rents and calculates natural breakpoints on multiple income categories. Analysis of sales data can be processed by store, tenant, region, lease or other categories that you define. Each individual tenant can be evaluated against relevant benchmarks. Budgeting processes are fully automated, allowing you improve forecasting, tighten cost control, and increase staff productivity, as you gain superior control over your retail portfolio.
